Subject: RE: cost for anhydrous ammonia to Wyoming

Jim,

It would be around \$625 per short ton FOB at this time. As you know, this is continuously changing.

Thanks,
Jen

If you can get it easily, that would be good. Anhydrous ammonia FOB Wyoming.

Jim

Hi Jim,

I apologize that I couldn't get that answer to you last week. Would you still need something?

Thanks,
Jen

Jennifer,

I am putting together a cost estimate that I have to get together today and need an estimate for anhydrous ammonia delivered to Wyoming.

If you can't get it today, it's not the end of the world. I'll use the utility estimate. But, I'd like an independent estimate if possible.

Best Regards,
